

KUDOKE 2 RED DUNES LIMITED EDITION

EXCLUSIVELY CURATED FOR

10:10
LABS

Inspired by the infamous red dunes present in parts of the Arabian Peninsula and combining the inspiring artistry and craftsmanship of independent watchmaker Stefan Kudoke, 10tenlabs® and Kudoke present the **Kudoke 2 Red Dunes Limited Edition**, a one-off exclusive 10 pieces limited edition for the Middle East region celebrating the partnership and appointment of 10tenLabs® as Kudoke's official distributor and retailer for the Middle East region.

The KUDOKE 2 Red Dunes Edition is a unique timepiece curated with attention to detail and adds a lustrous **oxydred frosted dial**, which represents the vibrant color of the red dune sands when sun rays hit it.

Since its launch KUDOKE 2 with its rotating domed 24-hour disk at 12 o'clock has become one of the most recognizable and most popular models within Kudoke's unique line of timepieces, not last because of its success as winner of the 2019 GPHG Petite Aiguille Award in its bright silver dial version.

By subtly combining elements of Arabia and Kudoke's artistry and craftsmanship, this timepiece is manufactured by humans. From the hand-grinded surface of the movement bridge to the hand-engraved balance cock with 10:10 Labs branding one can perceive what makes a hand finished watch so special.

This 10 piece edition was sold out upon its launch to leading watch aficionados within the 10tenLabs collector community.
